SMARTESLA HOLDING

science – innovation – technology

ST PEBS®

OUR INNOVATION

FOR YOUR SAFETY

SMARTESLA HOLDING

ST-PEBS is a new revolutionary innovative global device, which has a new technological solution with which we completely

- neutralizes the lethal effects of electricity
- neutralizes electrical fires
- neutralizes current peaks (also serves as a voltage stabilizer)
- neutralizes the negative effects of contact with water and electricity
- neutralizes short circuits
- Savings in electricity costs of over 30% (New generation of E-PEBS)

Thanks to our innovative application, we have complete control over all of our electrical devices as well as detailed energy control.

Smartesla PEBS can be globally implemented in all buildings, apartments, houses, hotels, schools, hospitals, factorys, mines, work sites, machines, cars, planes, ships, trains, wherever electricity flows because it protects life and property.

ST-PEBS ist ein neues revolutionäres innovatives globales Gerät, das über eine neue technologische Lösung mit folgenden Eigenschaften verfügt:

- neutralisiert die tödliche Wirkung von Elektrizität
- neutralisiert elektrische Brände
- neutralisiert Stromspitzen (dient auch als Spannungsstabilisator)
- neutralisiert die negativen Auswirkungen des Kontakts mit Wasser und Strom
- neutralisiert Kurzschlüsse
- Stromkosteneinsparung von über 30% (Neue Generation von E-PEBS)

Dank unserer innovativen Software haben wir die vollständige Kontrolle über alle unsere elektrischen Geräte sowie eine detaillierte Energiekontrolle.

Smartesla PEBS kann weltweit in alle Gebäude, Wohnungen, Häuser, Hotels, Schulen, Krankenhäuser, Fabriken, Bergwerke, Baustellen, Maschinen, Autos, Flugzeuge, Schiffe, Züge, überall dort eingesetzt werden, wo Strom fließt, denn PEBS schützt Leben und Eigentum.

ST-BEBS je novi revolucionarni inovativni globalni uređaj s tehnološkim rješenjem koje u potpunosti:

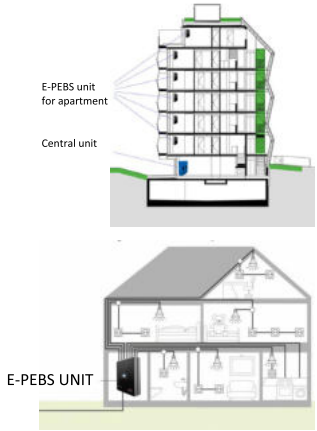
- neutralizira smrtonosne učinke električne energije
- neutralizira električne požare
- neutralizira vršne vrijednosti struje (služi i kao stabilizator napona)
- neutralizira negativne učinke dodira s vodom i električnom energijom
- neutralizira kratke spojeve
- omogućuje uštedu u troškovima električne energije veće od 30% (nova generacija E- PEBS)

Zahvaljujući inovativnoj aplikaciji, imamo potpunu kontrolu nad svim našim električnim uređajima kao i detaljnu kontrolu energije.

Želimo istaknuti još da Smartesla PEBS se može globalno implementirati u sve zgrade, stanove, kuće, hotele, škole, bolnice, tvornice, rudnike, gradilišta, mašine, automobile, avione, brodove, vozove… dakle, sve gdje električna energija struji jer štiti živote i imovinu.

ST-PEBS (MOBILE DEVICE)

Weight:	40 kg
Voltage / Hz:	110-400V / 230 V, 50 Hz
Material:	Plastic, galvanized sheet metal
Power:	4 KW
Colour:	blue / black
Mobility:	Wheels, telescopic handle, side handles
Output sockets:	2 pieces
Power consumption:	120W
Dimensions:	32x20x54 cm (length / depth / height)



ST-E-PEBS (ELECTRONIC DEVICE)

Weight:	24 kg
Voltage / Hz:	110-400V / 230 V, 50 Hz
Material:	reinforced plexiglass
Power:	4 KW
Colour:	black / gray
Mobility:	fixed installation
Particularities:	Touchscreen, energy saving function
Power consumption:	135W
Dimensions:	30x10x40 cm (length / depth / height)
