1st April 2021

FEDERAL REPUBLIC OF GERMANY  
FEDERAL MINISTRY OF TRANSPORT AND DIGITAL INFRASTRUCTURE  
Dienstgebäude Invalidenstraße 44  
10115 BERLIN

**SUBJECT:** Maximum permitted dimension of a road train for cars transport in the  
Federal Republic of Germany

Dears,

The Foreign Trade Chamber of Bosnia and Herzegovina has received several inquiries from international transport companies, stating that there are different interpretations of the maximum length of a car transporter, depending on the province in the Federal Republic of Germany.

According to the national legislation of Bosnia and Herzegovina, the maximum permitted length of a car transporter may not exceed the length of 21.00 m.

We kindly ask for the official information on the maximum permitted dimensions of a car transporter in the Federal Republic of Germany, particularly:

- maximum permitted length of the loaded transporter;
- maximum permitted height of the loaded transporter;
- maximum permitted overhang to the front of the transporter (over the vehicle cab);
- maximum permitted length of the trailer in relation to the motor vehicle.

Also, please be so kind to inform us if there are some exemptions in a legislation by individual provinces.

Thank you in advance for your engagement and for providing relevant information to carriers in order to facilitate international transport.

With respect,

Delivered:

- to Title,
- a/a.
